

The relevance of Cushitic for the linguistic history of East Africa

Maarten Mous, Christian Rapold, Ahmed Sosal

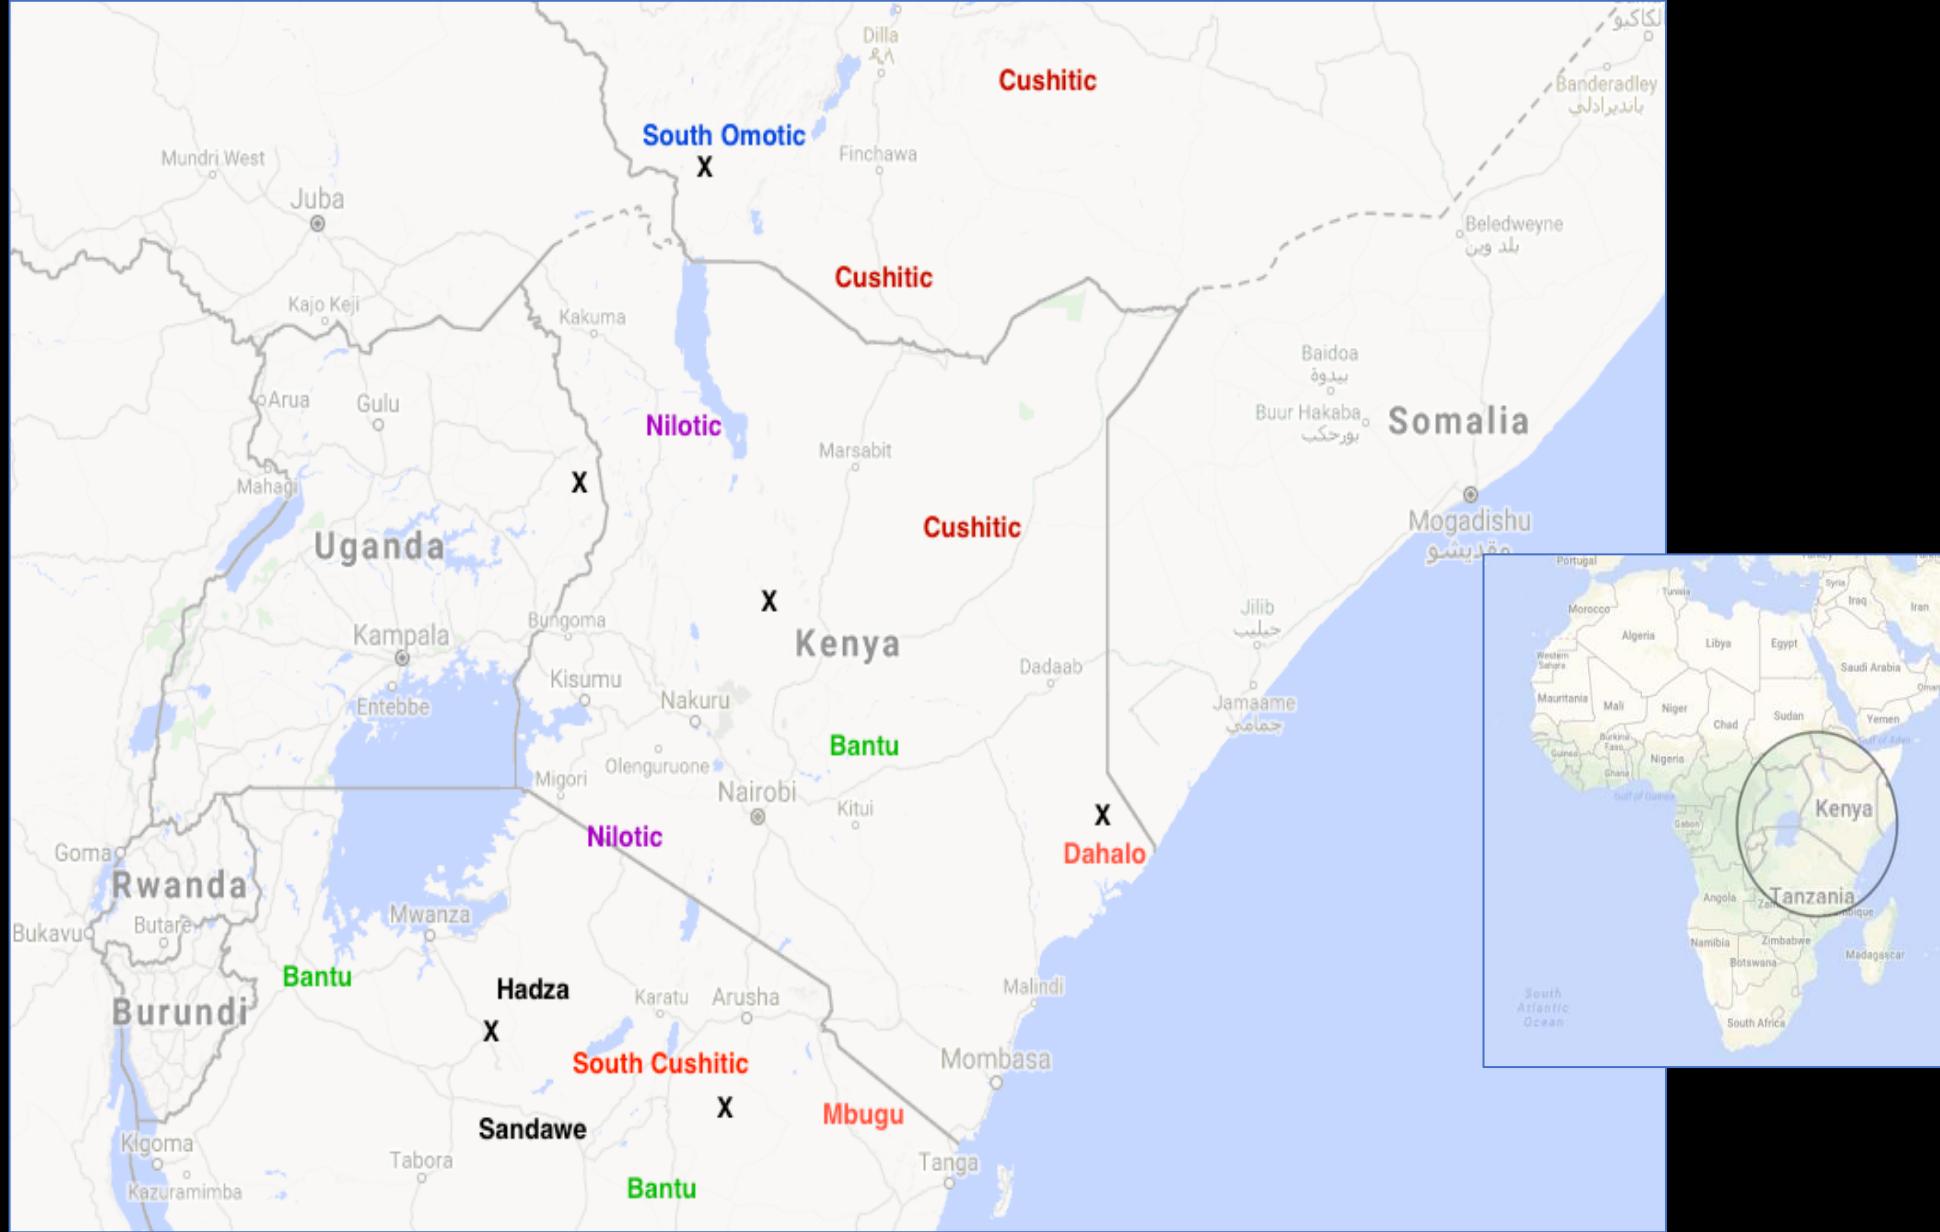

Content

- Introduction
- Cushitic pluratives and a link between Tanzanian Cushitic and East Cushitic
- Pre-Oromo link to Tanzanian Cushitic
- Tanzanian Cushitic present earlier
- Other results Past, Present and Future

Introduction

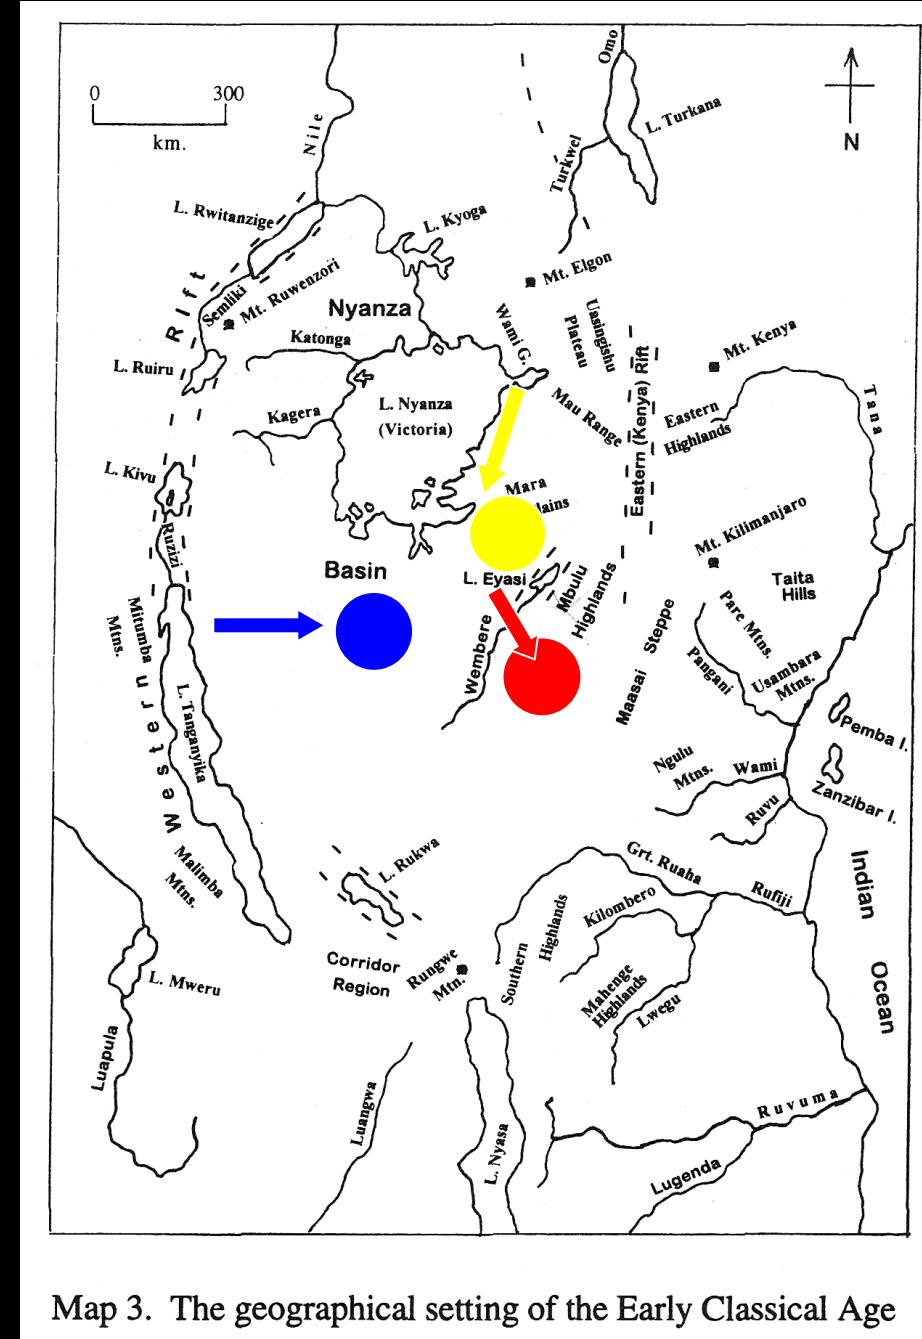

Linguistic landscape of East Africa

School book view of EA history

- Southern Cushitic 4000 BP
= Pastoral Savannah Neolithic culture
- Eastern Bantu 1500 BP
= introduction of iron; pottery styles
- Southern Nilotic 1000 BP
= Elmenteitan culture

Before these migrations: Hunter-gatherers; stone age culture; KhoiSan languages (Hadza and Sandawe)

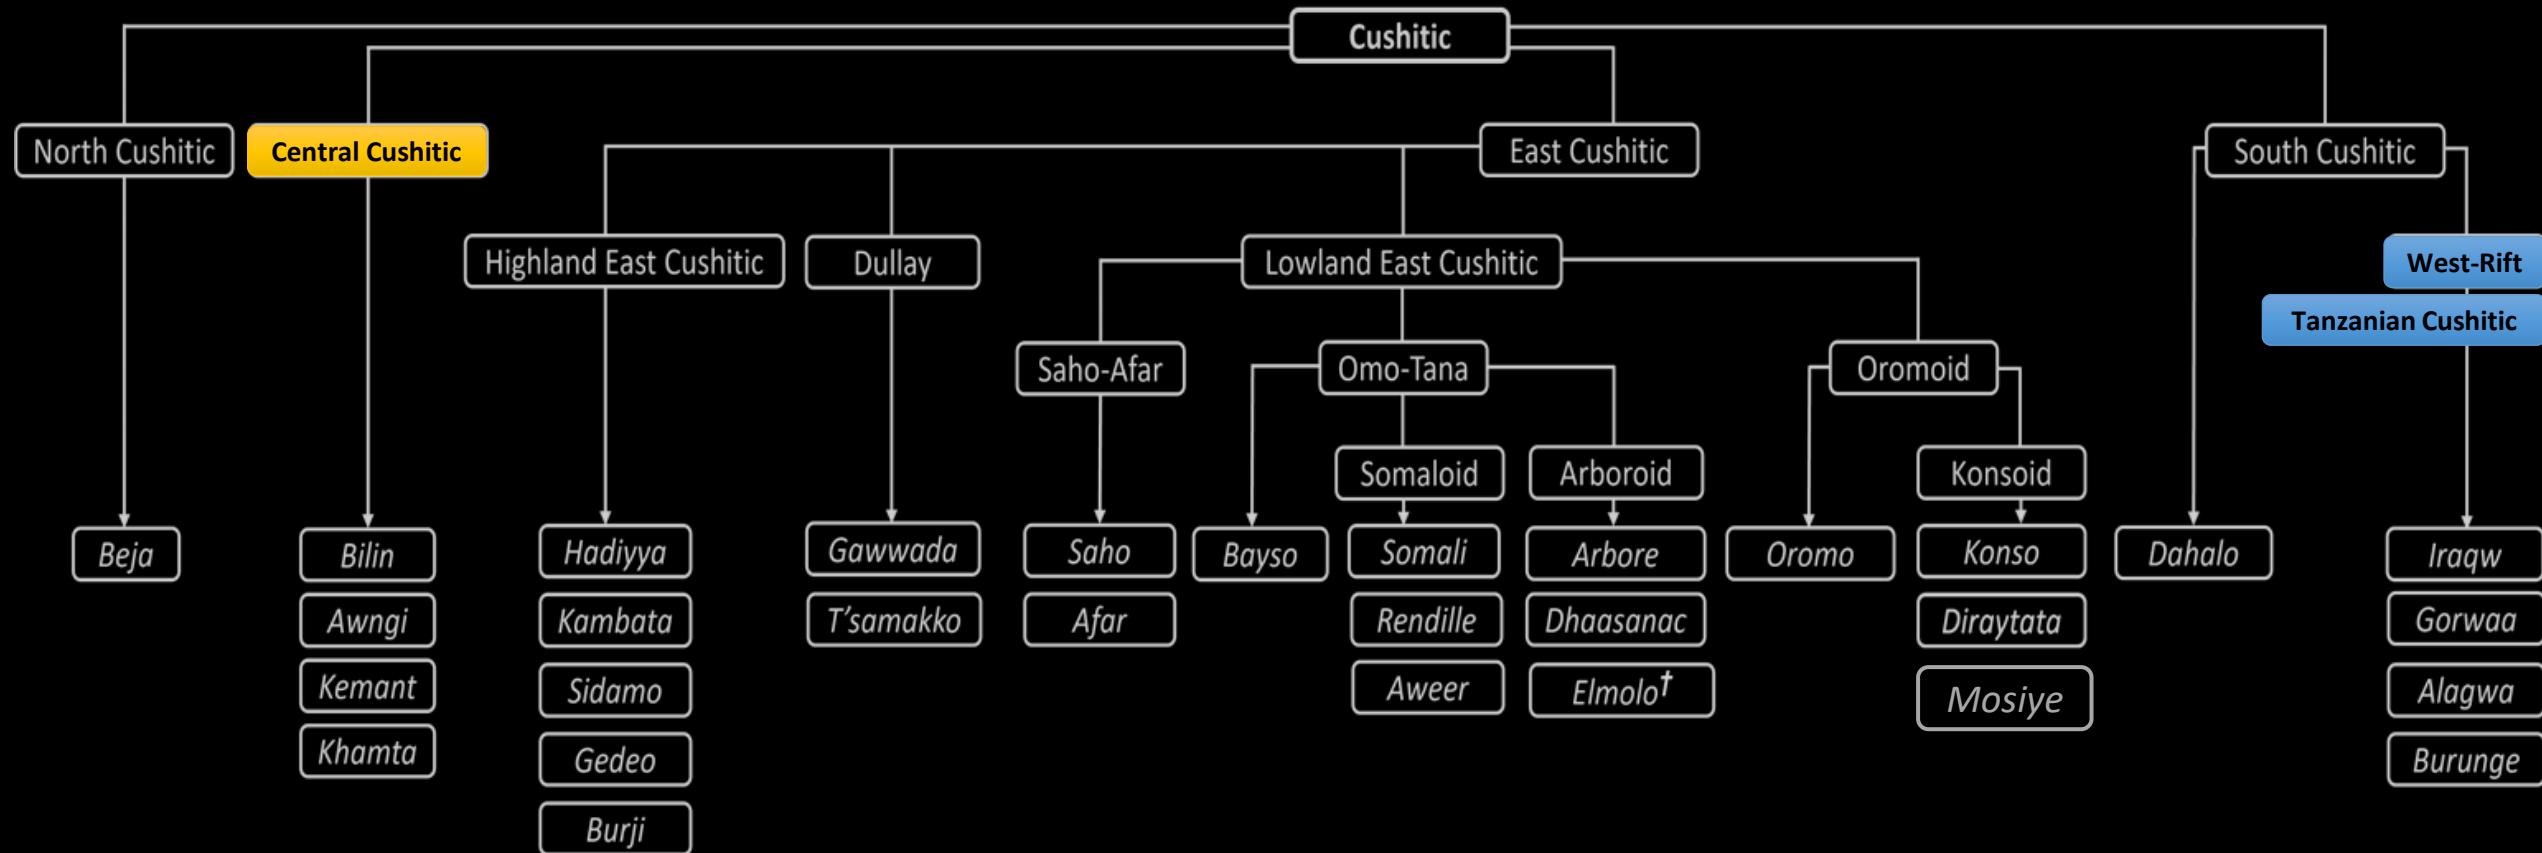

Map 3. The geographical setting of the Early Classical Age

Linguistic history of East Africa project

- Reach new state-of the-art of EA linguistic history and AFTER the project discuss that with relevant other disciplines.
- Establish lexical and phonological reconstruction of Cushitic
- Re-examine the lexical influence of Cushitic on Bantu languages and what it tells us about cultural changes and in subsistence
- Details of the history of the big migrations into East Africa
Today we discuss: Several Cushitic movements into East Africa
- Reconstruct histories of contact
- Examine possibilities of unearthing earlier language families
- We are just over 2,5 years into a 4-year project

Cushitic pluratives and a link between Tanzanian Cushitic and East Cushitic

The Cushitic languages included in this study

Kiessling & Mous, 2003

Inventory of Cushitic pluralative suffixes

Types of pluralative suffixation

PLV form	Example			
	Language	SGV	PLV	Gloss
Vowel-Based suffix VB	Diraytata	<i>laf-to</i>	<i>laf-a</i>	'bone'
a vowel -V				
Consonant-Based suffix CB	Bayso	<i>lef</i>	<i>lef-aal</i>	'bone'
vowels and a consonant -V(V)C(C)-V(V)				
Reduplication RD	Rendille	<i>laf</i>	<i>láf-áf</i>	'bone'
reduplication or gemination of the last syllable/consonant	Boni	<i>laf</i>	<i>laf-f-a</i>	'bone'

Reconstructed plurative suffixes

Cushitic

*-a(a), *-(V)C-(V), (*-w-, *-y-, *-m-, *-n-, *-t-, *-l-)

**North Cushitic
(Beja)**
*-a

**Central Cushitic
(Agaw)**
*-a (+CB)

East Cushitic

*-a, *-aC-aa, *-aww-aa, *-ayy-a, *-aam-a, *-aan-a, *-at-a, (*-eeti), *-all-o

Highland East Cushitic

*-a (coll.),
*-C-a,
*-uw-a,
*-eeyy-e,
Vmm-a,
*-ann-a,
*-at-a,
*-all-o,
*-o

Lowland East Cushitic

*-a, *-aww-aa, *-ayy-a, *-aam-a, *-aan-a, *-at-a

Dullay

*-aan-e,
*-add-e

Oromoid

*-a, *-aww-aa,
*-ayy-a, *-aan-a,
*-at-a

Omo-Tana

*-aan-o, *-aC-aa, *-ayy-a, *-aam-a,
*-all-o (Proto-Eastern-OT), *-oo, *-e,

Konsoid

*-a,
*-C-aa,
*-ayy-a,
*-add-aa

Arboroid

*-a,
*-aww-aa, *-ay,
*-aam-a,
*-an-o,
*-o, *-u, *-e

Somaloid

*-aC,
*-ay-V,
*-aan,
*-eti,
*-yaal-o, *-o

Tanzanian Cushitic

*-aa,
*-aC-aa,

eem-aa,
*-eem-oo,
*-an (Adj.),
*-oo,
*-u!,
*-ee,
*-i,
(*-en),
*-eeri,
*-aC-ee,
*-aC-u

Hypothesis: Proto-Cushitic

Independent pluralization strategies

- suffix *-a(a)
- Reduplication/gemination

PL doubling for reinforcement

- *-(V)C-a(a)
- *-C-C-a(a)

6-Consonant-Based forms?

- *-y-, *-w-, *-t-, *-m-, *-n-, *-l-

Hypothesis: CB renovation

Retention

*RD + (*VB)	→ RD+VB
*VB	→ VB

Renovation

*6-CB moribund → (utilized *RD mechanism) +(VB) → renovated CB

- accounts for possible Afroasiatic links (cognates)
- accounts for the synchronic variation in the number of PLVs
- the *6-CB limits the revivable CB suffixes utilizing the RD mechanism
- NC Beja lack of reduplication PLV blocked the CB renovation
- the shared TC and EC CB renovations suggests shared history

(Tanzanian) South Cushitic links to East Cushitic

- Kießling's (2001) diagnostic PLV isomorphs (Proto Omo-Tana from Corbett & Hayward (1987)

Proto Omo-Tana POT	Proto Tanzanian Cushitic
*-Ca(a)	*-aCa
*-oo	*-oo
*-u	*-u
*-e	*-ee
*-aani	*-an (ADJ PL)

- They have no parallels in Agaw or in Beja
- Are they POT/PEC innovation or PC retentions?

Revised Cushitic subgrouping based on PLV evidence

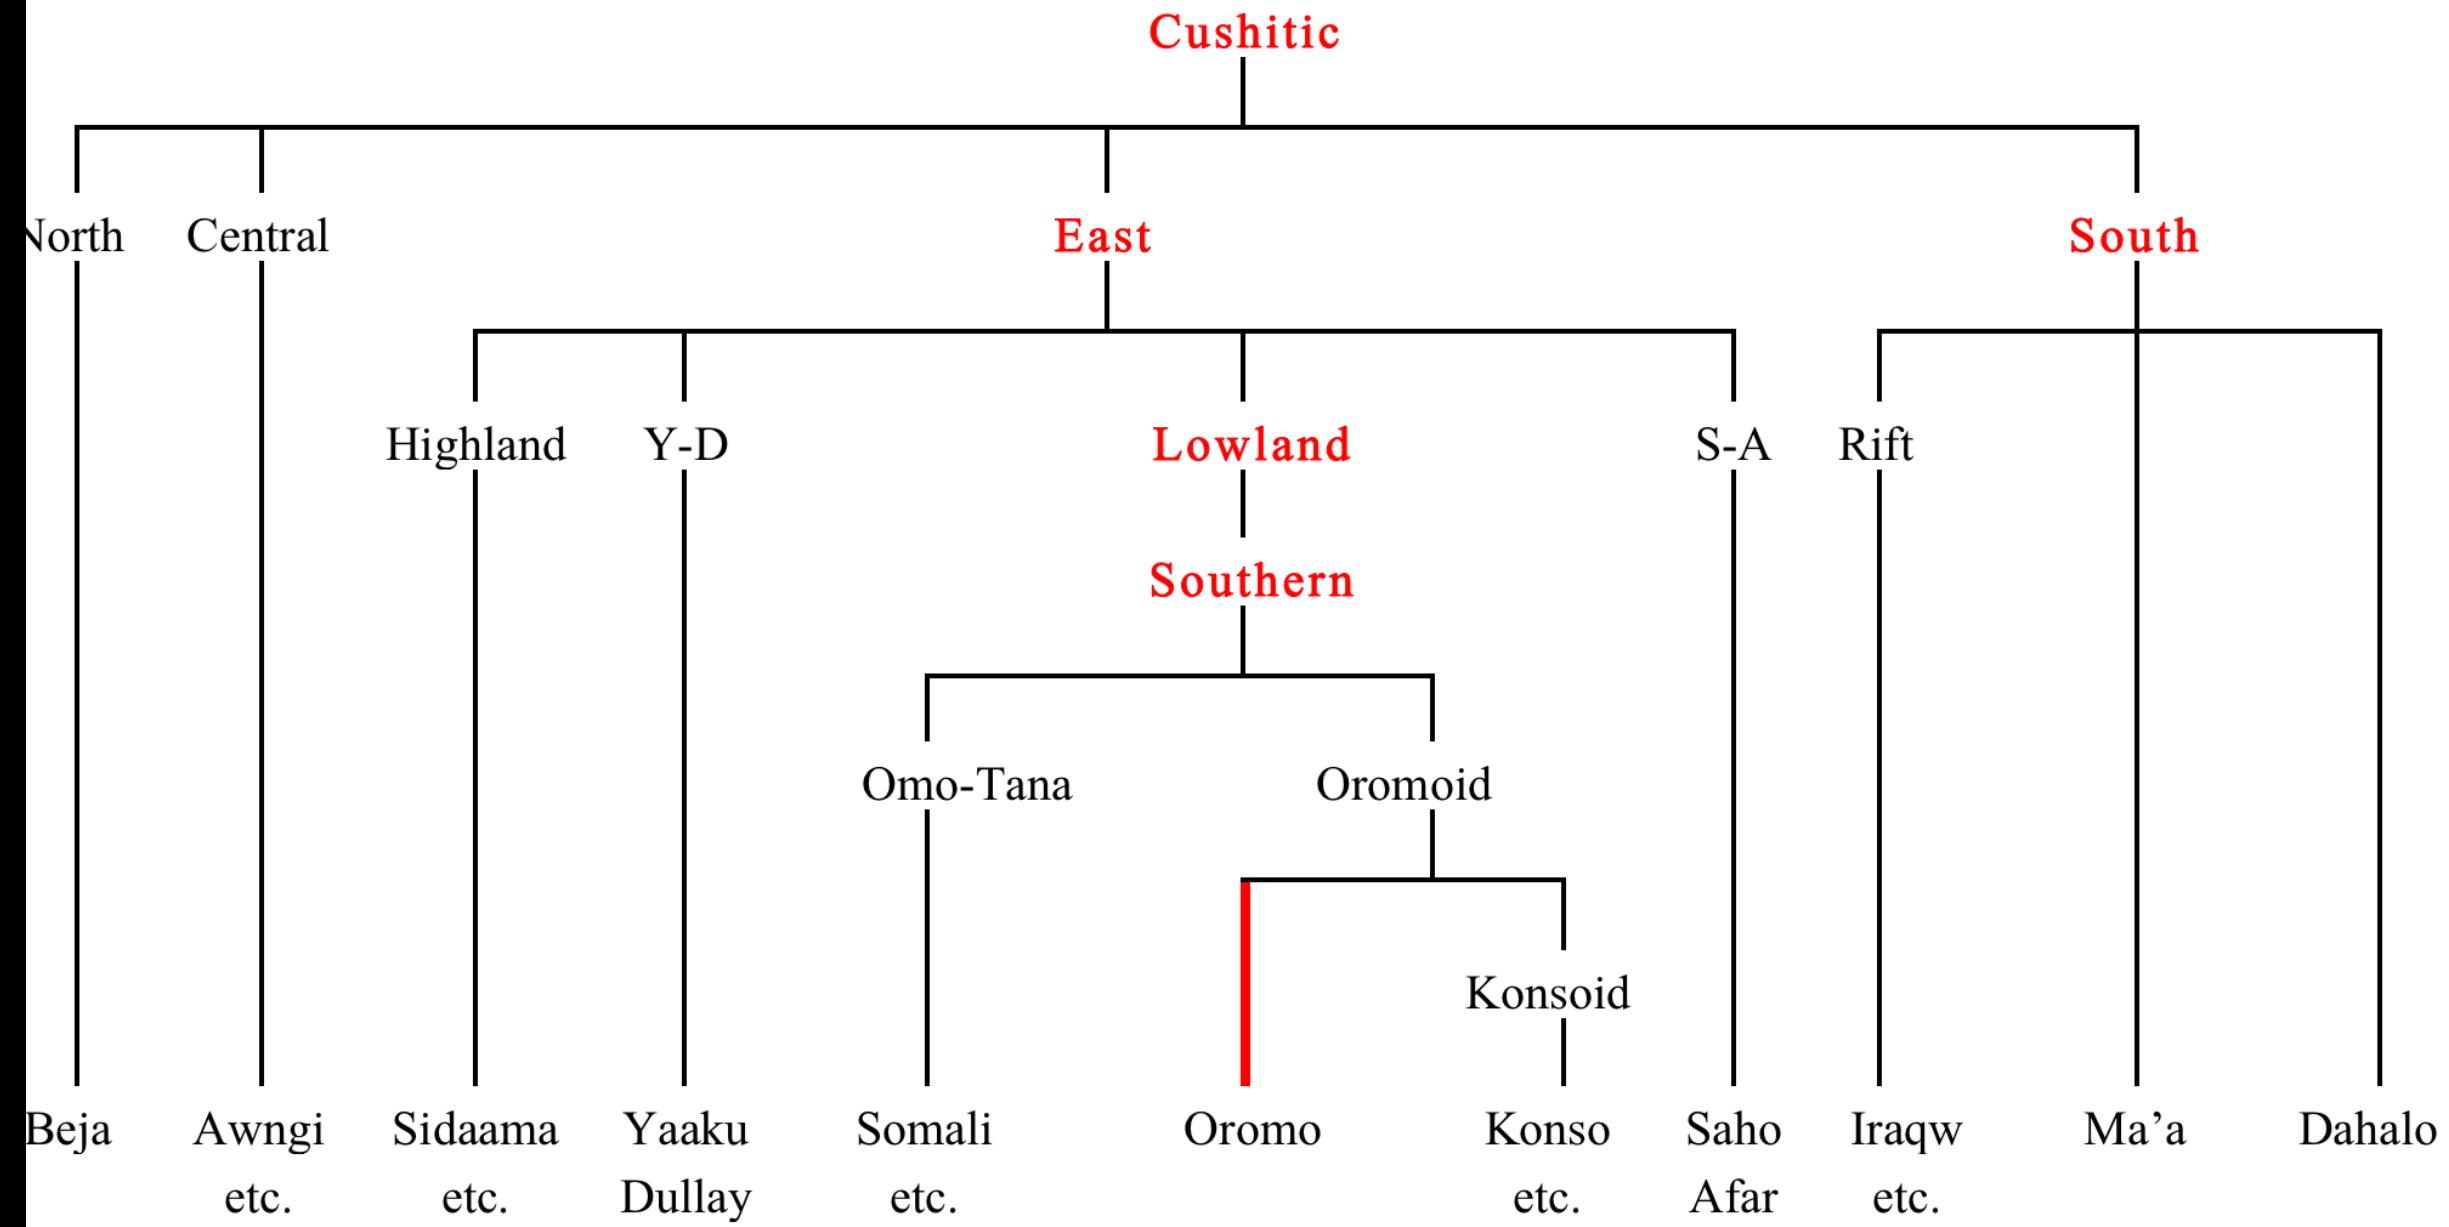

Pre-Oromo link to Tanzanian Cushitic

Historical implications of Tanzanian Cushitic

¶

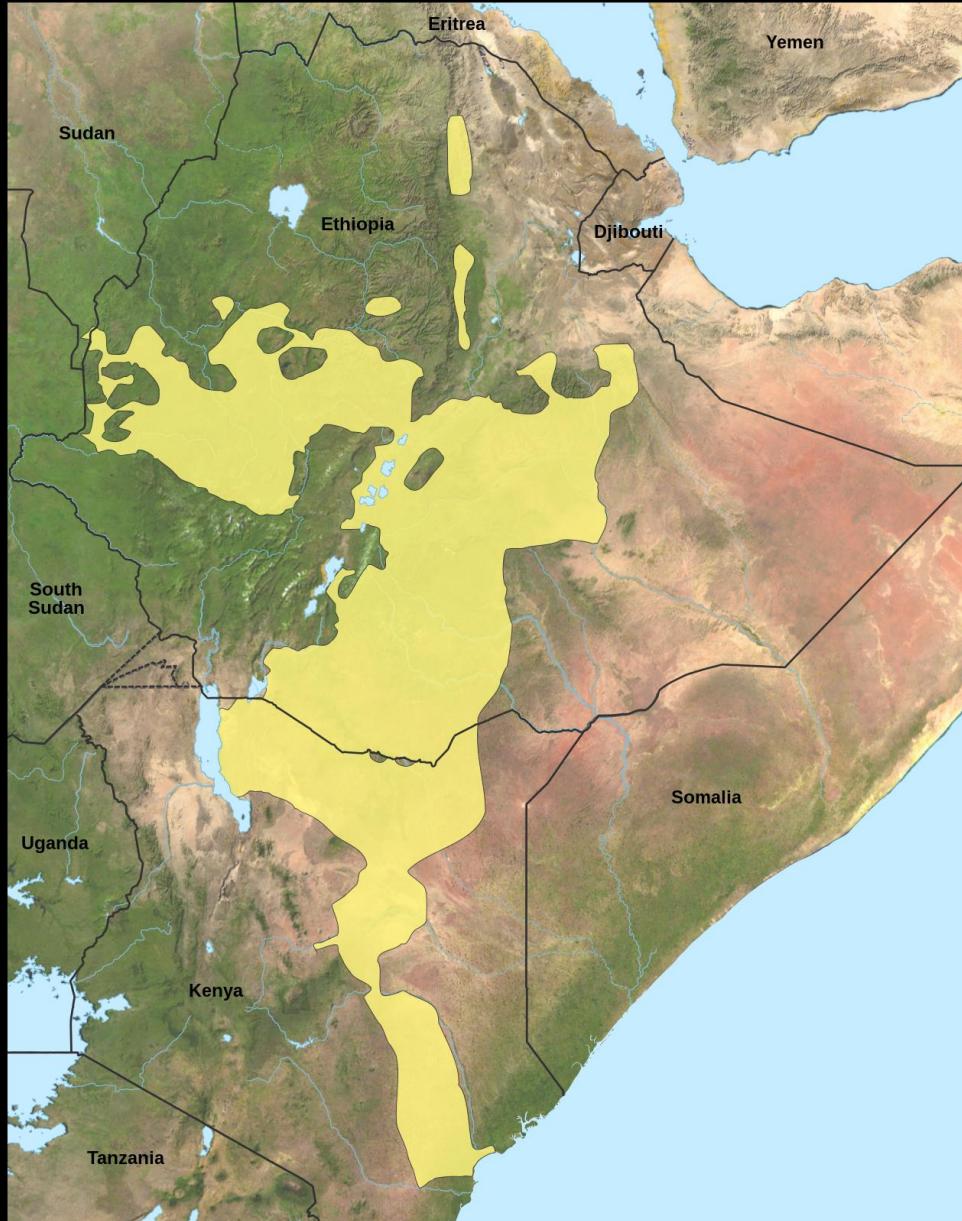

P-TanzC *‡ : P-EastC *¶

Proposals

1. Some P-TanzC *† are secondary
2. These are linked to Pre-Oromo

Oromo

P-TanzC ***ta?** ‘to love, like, want’

: Oromo **ja:l-** ‘to love’ < P-EastC ***geɻl-** ‘*id.*’

P-EastC > Oromo

P-EastC *gečl-

gečl- č > č

-ččer- palatalisation g > č / __ {i, e}

ččer- lowering e > a / [most contexts]

Or. ččer- č > V: / { _ C, C _ }

P-EastC > Pre-Oromo > P-TanzC

P-EASTC

*geʃl-
geχl-
ʃeχl-
ʃaχl-

ʃaχl-

branching-off / transfer to P-TanzC

ʈaχl-

ʃ > ʈ

ʈaχ-

non-initial l > Ø

Conclusions

Some P-TanzC *¶ < P-EastC *g

via Pre-Oromo

Relative chronology

(x) $e > a$

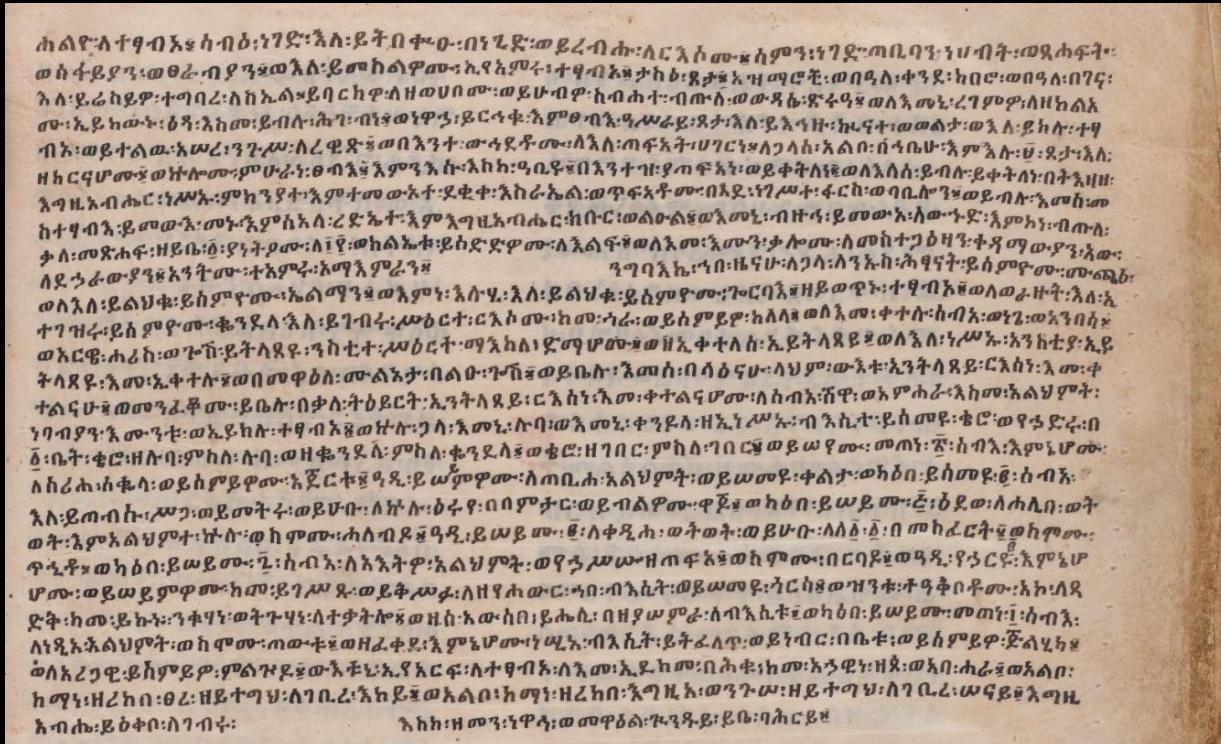

(y) $\wp > V:$

Absolute chronology

AD 1593

<Pajärītu>

What if Tanzanian Cushitic is Oromoid?

- Instead of 4000 BP less than 400 BP
- Place and period of lexical transfer into Bantu languages changes
- Extensive differentiation of Tanzanian Cushitic in little time

Tanzanian Cushitic present earlier

Evidence that Tanzanian Cushitic is earlier

- Proto-Tanzanian-Cushitic words that can shown to be Cushitic retentions but did not undergo Oromoid innovations

Old words-1

Proto Tanzanian Cushitic *daangw (m) ‘elephant’

IR daangw

GO daw

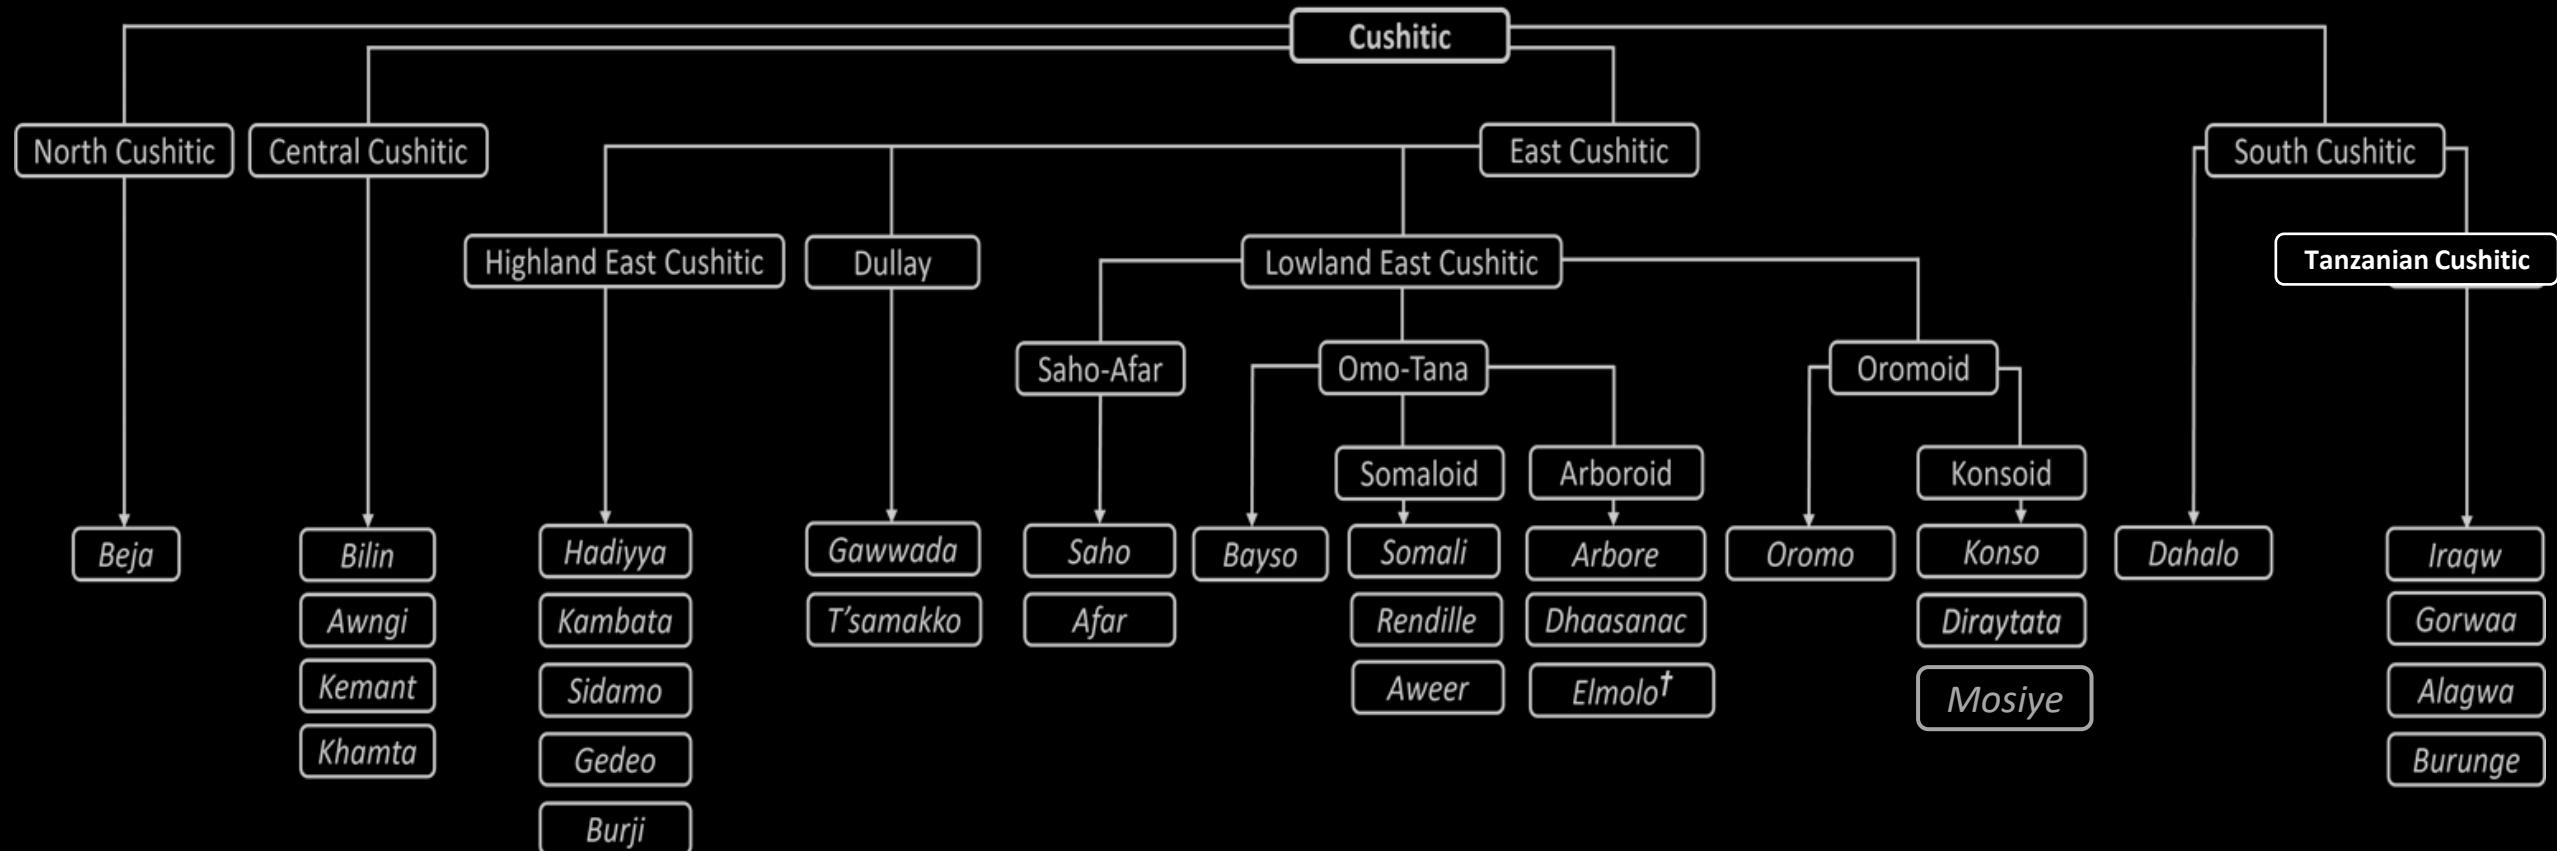

AL daw

BU daw

Cushitic cognates:

- Somali **dagon** id., Proto-Highland-East-Cushitic ***dzaane** id.; Proto-North-Agaw ***3an-a** ‘elephant’.
- Different root: Oromoid: Oromo **arpa**; Konso **arpa**; Dullay: Grawwada **arap**; Tsamakko **araf-ko**;
- NB: Omotic parallels: Aari **dangór**, Karo **dongwar**, Hamer **dongur**, Wolaytta **dangarsa**.

The Cushitic languages included in this study

Old words-2

Proto Tanzanian Cushitic: ^PNWR*Ɂeetl (v) ‘be unripe’

IR Ɂeetl (adj) ‘fresh, raw’

GO Ɂeetl (adj) ‘unripe’

AL Ɂeetl (v) ‘be unripe, be raw’

- Cushitic cognates: Arbore heedd'í ‘raw’, Afar Ɂeed' ‘be raw’, Somali Ɂayd'iin ‘unripe’.
- Different: Oromo d'eed'ii ‘raw’; Konso: orkooma ‘unripe’; Gawayada ?arkum-k-o ‘unripe fruit’; Tsamakko laxx.
- Good cognate set with in Cushitic including Tanzanian Cushitic but excluding Oromo (and Dullay).

and many more

Bonny Sands and Mauro Tosco proposed last week a Dullay (peripheral East Cushitic) presence in the Tanzanian Rift Valley based on cognates between Hadza and Dullay

Explains? odd semantic shift in numbers

Number	*Agaw	*Tz Cushitic	*East-Cushitic
2	*läŋa/laŋa	*tsada	*lam(m)
3	*säyʷa/səyʷa	*tam	*saddeḥ
4	*sä3a	≈ *ts'igaḥa	≠ *'afur

Scenario

Tz Cushitic had something like **sägya** '4'
and came into contact with East Cushitic speakers using something like
seddeḥ'3'

The two forms amalgamated to TzCushitic **tsigaḥa** '4' (with final ḥ)

And shifted the East Cushitic word for '2' to mean '3'.

A new word for '2' was coined (*tsada from tsat 'to cut, split'?)

Conclusions

- Pre-Oromo influence on an existing Cushitic speaking population in Central Tanzania.
- No memory of that in oral history
- No non-linguistic indications (yet)
- Not one but THREE Cushitic migrations into Tanzania;
- or the bluntness of Ockham's razor.

Other results Past, Present and Future

Other results

- Paper on contact-induced retention of lateral fricatives and lateral ejective affricates in Tanzanian Cushitic (Also in Hadza, Sandawe, **Kuliak**, ~~South-Nilotic~~; and contact-induced introduction in Davida-Bantu).
- Rangi and Mbugwe (Bantu) are reconstitutions of different Bantu languages belonging to different clans
- Aasa and Kw'adza do not form a unit, and Kw'adza is in Tanzanian Cushitic (Iris Kruijsdijk)
- There is considerable contact between Kuliak (Uganda, isolated family) and Tanzanian Cushitic and Sandawe
- The Cushitic influence on Taita Bantu languages does not warrant posing two (or 3) former Cushitic languages but one (Sophie Mulder)

Other on-going

- Is morphosyntactic innovation in Mbugwe and Rangi shared or parallel? (Giorgia Zantei)
- What is contact-induced change in kinship terminology in the Tanzanian Rift Valley (Marta Cestari)
- Can the lexical density in certain domains in languages by hunters provide an indication whether they are impoverished herders or hunters who shifted language (Dominique Loviscach)
- ...
- Reconstruction of lexical transfer of Cushitic into (groups of) Bantu languages (Christian and Maarten)

Thank you!

lheaf.org

Discussion

The hypothesis of PLV vowels change

(Cushitic regressive assimilation rule)

$$V > a / _{*}Ca(a)$$

reduplication RD	*V-	C	Rendille kàr-ár 'dog'
	[RD/EPENTHETIC V]	[RD C]	
stacking RD + *-a	*V-	C- -a	Alagwa kwar-ar-aa 'year'
	[RD/EPENTHETIC V]	[RD C] [*-a]	
regressive assimilation	*a-	C- -a	Oromo hol-aata 'sheep'
	[assimilated *-a]	[RD C] [*-a]	
boundary shift & reinterpretation of RD	*a-, i-, e-, u-, o-	C- -a	Oromo hol-oota 'sheep'
	[*-a, FRONT, BACK V]	[RD C] [*-a]	
final V marks gender, case, etc.	*a-, i-, e-, u-, o-	C- *-a, -i, -e, -u, -o	Somali koob-eti 'glass'
	[*-a, FRONT, BACK V]	[RD C] [*-a, FRONT, BACK V]	
consonant changes, e.g., lenition	*a-, i-, e-, u-, o-	C- *-a, -i, -e, -u, -o	Gawwada ⁷ Gíll-iđđe 'cowskin'

Alternative hypothesis

Proto-Cushitic → Cushitic languages

*RD → RD

*VB → VB

*RD+*VB → RD+VB

Hypothesis 1	Hypothesis 2	Hypothesis 3 (1+2)
6-archaic Forms *CB *-y-, *-w-, *-t-, *-m-, *-n-, *-l-	*VB + *RD → CB	*6-CB(moribund) → *RD+(VB) → CB (renovated)
